

Applied AI Solution Architect

Salary range of £80,000 - £110,000 plus EMI

About Tomoro

Tomoro enables organisations to realise competitive advantage with the power of Generative AI. We work with large corporate clients to create meaningful AI strategies, build production-ready AI solutions and effectively integrate those solutions in their businesses.

Our alliance with OpenAI and NVIDIA (among others) enables us to lead the industry in building valuable, scalable, enterprise-ready solutions for businesses.

We're driven by applied R&D, prototyping and AI innovation. Our client teams are focused on tackling the most challenging aspects of applied AI in the enterprise sector directly with clients.

About the role

Applied AI solution architects are expected to work in small teams of Tomoro and client engineers to design, build and deploy AI applications, such as agents built around Large Language Models.

Our architects solve complex and technical design challenges, ensuring smooth transitions from development to deployment, and act as a vital link between technical and non-technical stakeholders.

The role involves leading project delivery, mentoring junior colleagues, and staying updated with AI advancements. Architects are critical in ensuring our AI solutions are reliable, ethically compliant, and rigorously tested.

In partnership with:

Responsibilities

The examples describe the types of responsibilities AI solution architects at Tomoro will have.

We do not expect every successful candidate to have experience in all of these areas. We encourage you to apply if the role excites you and you believe you can demonstrate a combination of the following capabilities.

Business Application Design:

Co-creating cutting-edge applied AI business solutions with clients and colleagues that will realise meaningful value with a feasible route to reality.

Solution Design:

Designing and prototyping AI solutions and building engineering teams who can realise your design at scale - you know the best designs are working prototypes and want to use these as a basis for an engineering team to bring ideas to production-grade scale.

Delivery Problem-Solving:

Solving complex delivery problems that arise during the development and scaling of AI solutions. You'll help connect the dots to realise route to live for our clients and be the primary translator between engineers and non-technical stakeholders.

Delivery Leadership:

Providing delivery guidance and leadership within the team, including mentoring junior colleagues and contributing to skill development.

Continuous Learning and Adaptation:

Staying updated with the latest developments in AI, machine learning, and related technologies to continually enhance the quality of solutions offered.

Quality Assurance and Testing:

Ensuring the reliability, effectiveness, and safety of AI solutions through rigorous testing and quality assurance practices.

Ethical Consideration and Compliance:

Upholding and actively contributing to ethical standards in AI development, including considerations for data privacy, bias minimization, and regulatory compliance. Helping to expand our knowledge on this subject and driving ethical ways to implement AI.

Senior Client Relationships:

Building robust, trusted, relationships with senior business and technical clients are a key part of your role. We aren't a company of body-shop engineers - we constructively challenge our clients to help them become AI leaders in their field.

Delivery Stewardship across a Portfolio of Projects:

You may work across multiple accounts or projects simultaneously, amplifying your impact through effective team leadership. Your ability to juggle various responsibilities will be key to the success of our projects.

**Our mission is to make
the 3-day working
week a reality!**

Everyone in Tomoro shares the passion for AI technology and its power for good and we are looking for people who believe in that mission to join us on our journey.

Indicators you'll be a good fit

Strong experience leading teams to design and develop production-grade solutions in enterprise, involving:

- Python application development
- Building microservices
- Data technologies
- Large language models

Strategic thinker and team leader:

You get as much joy from managing and leading teams as you do from developing solutions. You can demonstrate successful experience in both hands-on engineering and owning outcomes from inception to completion. You are comfortable setting out a vision for a solution, planning out tasks, managing teams and taking decisions. You are passionate and positive and can inspire and motivate teams to come together deliver in challenging circumstances.

Standard setter:

You set high standards of delivery and technical excellence for yourself and your teams, providing guidance, identifying areas for improvement and constantly striving towards creating high-performing teams.

AI translator:

You seek out and enjoy opportunities to bridge the gap between business and technical stakeholders - comfortable discussing AI with business leaders and a hands-on engineer.

Coach, mentor and educator:

You have a history of supporting the professional development of your colleagues, creating a supportive environment which encourages learning and growth. You are committed to sharing knowledge and driving collective improvement across Tomoro and our clients' organisations.

"Multi-threaded" operator:

At this stage of Tomoro's journey, we often need our senior team members to contribute to or oversee multiple projects at the same time. Your ability to balance your time and focus across a portfolio will be important for you to succeed.

Innovator and thought leader:

You proactively stay up to date with the latest developments in AI technology, connecting the dots and devising ways to apply new tools and techniques to real world problems faced by Tomoro and our clients. You contribute to the organisation's knowledge base and assets and are developing a reputation in the market for your insights and expertise.

Believe in AI as a force for good:

You are motivated by the mission to create the 3-day work week as a default for the working world - and believe that AI can create a more valuable, more equitable world.

Package

Salary range of £80,000 - £110,000 + EMIs*

- Opportunity to join our *Enterprise Management Incentive Scheme, providing you with share options to benefit from the success of the business as we grow

- Access to exclusive discount platform

Location

Hybrid working policy. May need to be flexible to travel to client offices as part of project work.

Tomoro DNA

In Tomoro we value diverse perspectives and experiences, and we understand that some strong candidates will not fulfil every qualification listed above.

Studies have demonstrated that individuals from underrepresented groups often experience feelings of imposter syndrome, leading them to underestimate their suitability for certain positions. We strongly encourage you to apply if this role excites you, even if you do not meet every single criterion. Your unique skills and experiences might be exactly what we need.

Tomoro is committed to promoting equal opportunities in employment. You and any job applicants will receive equal treatment regardless of any legally protected characteristics.

We are committed to providing reasonable accommodations to applicants with disabilities, please make us aware of your needs upon application.

We're AI native - AI is our second nature
We're human-centred - prioritise people in progress
We try things out - we experiment and learn from experience
We're a collective - we work together to make tomorrow better than today
We show up differently - making each engagement and interaction with Tomoro feel distinctive
We build for business - we aim to be a workplace where AI meets industry IQ
