

# Front-End Engineer London

Salary range of £70,000 - £90,000 + EMI

## About Tomoro

Tomoro enables organisations to realise competitive advantage with the power of Generative AI. We work with large corporate clients to create meaningful AI strategies, build production-ready AI solutions and effectively integrate those solutions in their businesses.

Our alliance with OpenAI and NVIDIA (among others) enables us to lead the industry in building valuable, scalable, enterprise-ready solutions for businesses.

We're driven by applied R&D, prototyping and AI innovation. Our client teams are focused on tackling the most challenging aspects of applied AI in the enterprise sector directly with clients.

## About you

As a Front-End Engineer at Tomoro AI, you'll collaborate closely with product managers, designers, and backend engineers to build remarkable experiences that push the boundaries of Large Language Model (LLM)-based solutions. You'll have the opportunity to innovate and craft new methods for interacting with LLMs, while ensuring solutions scale effectively in enterprise environments.

We design solutions that address real, challenging problems by combining a deep understanding of user needs with expertise in LLM technologies.

### Responsibilities

---

This role is critical for building transformative AI systems that are reliable, interpretable, and trustworthy.

We leverage unique skills such as storytelling and prototyping to effectively communicate our ideas and their practicality to users, stakeholders, and teams.

At **Tomoro**, we work in collaborative design and engineering teams, emphasising attention to interaction and visual detail, focusing on polished UI/UX design, rapid iteration, continuous improvement, and learning.

The examples below illustrate the kind of responsibilities the FE Developer at Tomoro would typically own.

We do not expect every successful candidate to have experience in all areas; if the role excites you and you can show a convincing mix of the capabilities highlighted, we would love to hear from you.

#### Front-End Development

Contribute significantly to frontend development within one of Tomoro AI's solutions engineering teams.

#### Collaboration

Collaborate closely with engineers, designers, and other cross-functional teams to develop innovative features.

#### Quality

Write high-quality, thoroughly-tested code to tackle complex technical challenges.

#### Knowledge share

Share your knowledge and expertise with the frontend team, helping to define and uphold technical standards and best practices.

#### Full SDLC

Engage in the full software development lifecycle—from design and development through to deployment.

#### Example Projects:

- Designing and developing AI-driven agents that assist customers in planning and booking experiential holidays through engaging multi-modal interfaces.
- Building sophisticated research platforms to support teams that manage extensive information, enabling structured, auditable, and informed financial decision-making.
- Integrating an 'AI-sidekick' into a complex customer facing web application, using the clients existing design system and front-end component library

**Our mission is to make  
the 3-day working  
week a reality!**

Everyone in Tomoro shares the passion for AI technology and its power for good and we are looking for people who believe in that mission to join us on our journey.

## Indicators you'll be a good fit

Demonstrable experience building robust React applications with TypeScript/JavaScript.

Strong foundational knowledge of web technologies including HTML, CSS, and Browser APIs.

Familiarity with or interest in AI and Large Language Models, and their implications for modern software development.

Experience adhering to excellent engineering practices such as writing tests, participating in code reviews, and utilizing CI/CD.

Proven ability to thrive in fast-paced environments and a passion for delivering high-quality products.

Creativity and enthusiasm for overcoming challenges and creating intuitive, effective user interfaces.

Familiarity with modern web build tools and deployment pipelines.

### Package

Salary range of £70,000 - £90,000 + EMIs\*

- Opportunity to join our \*Enterprise Management Incentive Scheme, providing you with share options to benefit from the success of the business as we grow
- Holiday entitlement of 25 days + bank holidays
- Aviva Private medical insurance
- Mediacash wellness cash plan to help cover the cost of everyday healthcare needs
- Life Policy
- Employee Assistance Programme with access to 24/7 helpline for in-the-moment support from qualified BACP counsellors
- Company pension
- Access to exclusive discount & savings platforms

**Location:** London

Hybrid working policy. Depending on the client and project requirements, you should remain flexible and willing to travel to client offices up to three days a week.

## Tomoro DNA

---

In Tomoro we value diverse perspectives and experiences, and we understand that some strong candidates will not fulfil every qualification listed above.

Studies have demonstrated that individuals from underrepresented groups often experience feelings of imposter syndrome, leading them to underestimate their suitability for certain positions. We strongly encourage you to apply if this role excites you, even if you do not meet every single criterion. Your unique skills and experiences might be exactly what we need.

Tomoro is committed to promoting equal opportunities in employment. You and any job applicants will receive equal treatment regardless of any legally protected characteristics.

We are committed to providing reasonable accommodations to applicants with disabilities, please make us aware of your needs upon application.

### Our core principles

**We're AI native** - AI is our second nature

**We're human-centred** - prioritise people in progress

**We try things out** - we experiment and learn from experience

**We're a collective** - we work together to make tomorrow better than today

**We show up differently** - making each engagement and interaction with Tomoro feel distinctive

**We build for business** - we aim to be a workplace where AI meets industry IQ
